

A histogram showing the distribution of values for three groups: expert (dark blue), novice (light blue), and intermediary (medium blue). The x-axis is labeled 'Values' and ranges from -0.95 to -0.89. The y-axis represents frequency, with horizontal grid lines at intervals of 10, ranging from 0 to 100. The expert group has a very narrow distribution centered around -0.915. The novice group has a broader distribution centered around -0.91. The intermediary group has a distribution centered around -0.915, similar to the expert group but with more spread.
